

Model

Contributions to the model are essential for the development and continuous improvement of our project. Below, we outline the contributions made by team members:

Klaus Cedillo

Contributed to designing the map by adding traffic lights, cars, and buildings.

Luis Gallegos

Contributed to designing the map by adding streets, cars, and finding assets.

Federico Castro

Contributed starting the prototype map, and searching assets

MESA (Methods, Experiments, and Advanced Simulations)

Contributions to MESA are crucial for the assessment and validation of our project. Below are the contributions related to MESA:

Federico Castro

Contributed to the implementation and creation of our agents in MESA.

Daniel Bahena

Contributed to the research and documentation necessary to create the agents.

Klaus Cedillo

Contributed to the research and documentation necessary to create the agents.

Luis Gallegos

Contributed to the implementation and creation of our agents in MESA.
